Synopsis

This book is an accessible text for a Corporation law course and one readily adaptable to a Business Associations course. The clear, accessible narrative that students love is now everywhere, not just in selected sections. A new and updated online companion site includes Power Points, class outlines, quizzes and other materials. The second edition includes key updates on cases and legal concepts, including Citizens United, Dodd-Frank and say-on-pay. Customer Reviews

As a law student, I am often frustrated by the disorganization in typical legal textbooks, and I find them to be overly dry and dense - making difficult information even more difficult to understand. This is easily the best casebook I have ever used, and as difficult as this course and my professor were, I learned more in this class than any other class I have taken in law school thus far. I attribute a lot of my learning to the design and layout of this textbook. I would recommend this book to anyone with an interest in corporate law, or to any law student or lawyer who needs to learn this material.

This textbook has the worst editing I have ever encountered in a textbook, both through undergrad and law school. There are identical paragraphs that repeat one after another because it was accidentally duplicated and not edited out and there is a lot of useless information and chattiness to

the textbook that you just do not need when you are trying to read for class. Please read through your own textbook at least once if you expect students to read it too.

Bought this for my third year law student son. Arrived on time for classes, and saved him a few bucks over what the law school was charging for the same textbook.

Exactly the book I needed for class. Renting it was perfect.
