# Materials And Texts On Legal Problems Of International Economic Relations (American Casebook Series)

## Synopsis

This book focuses on the rules-based multilateral trading system established by the World Trade Organization, with particular emphasis given to the rich and detailed jurisprudence developed by the WTO's Appellate Body. After introductory chapters on international economics, international law, and US and EU constitutional and institutional issues relating to international trade regulation, the book explores the WTO's structure and takes a detailed look at its dispute settlement system. The heart of the book then treats the basic GATT rules on (i) trade liberalization (tariffs and quotas), (ii) non-discrimination (MFN and national treatment and the exceptions for FTAs, health and conservation), (iii) standards and (iv) trade remedies (safeguards, dumping and subsidies). Additional chapters cover trade in services, intellectual property issues, investment issues and several other trade-related issues. The new 6th edition offers a basic understanding of the international economic system.

## Customer Reviews

This is a terrible casebook. Had it for a law school class. It's terribly organized and doesn't read well.

Before I bought it, I didn't really know what this book talks about. I bought it only because it is an optional textbook for one of my classes. And it turned out to be such a useless thing in the era of internet and law database.
