Own Big Red: A Complete Craps Betting System

Synopsis

Craps is well-known to be a game with very low house advantage. So why doesn't your stake last as long as the odds say it should? I know why. And I want to share that truth with you. Whether you are taking a vacation to Las Vegas and want to stretch your gaming dollar, a casino local wanting to maximize playing time, or a low-roller who wants a shot at the brass ring, OWN BIG RED is for you. It's a complete system for betting on craps for the regular guy or gal. Let me share a secret with you: Gambling, especially gambling at Craps, is a game of TIME, not money. It only takes ONE CHIP to have a monster roll, if you are fortunate enough to walk up to the Craps table the moment it starts. So, your stack of chips equates to sand in an hourglass. You do not know WHEN that monster roll will start, so if you want to be there when the action starts, you must buy TIME by spending your chips to "place your bets", in the hope that the monster roll will start before your chips run out. If you do not understand correct principles, you will squander your chips faster than necessary, and you will lose. The casino is COUNTING on this. BUT, if you understand correct principles, and use them to defend your stack of chips like a warrior, you can buy more TIME, and increase your chances of being there to lay that ONE CHIP on the felt that starts the monster roll. That's really what you want, isn't it? In OWN BIG RED, you will see what is right with Craps, what is wrong with it, and what you can do about it. You can (that means YOU MIGHT) walk out of the casino a winner, or at least cut your losses and not walk out broke. You will be genuinely excited about playing after reading OWN BIG RED. More importantly, you will no longer fear losing. In Own Big red, you will learn: What makes up a complete gambling system; What the casino's REAL advantage is (and it's not the 1.41% edge that the house has). Once you know this, you will never play the same way again; What a trend is, and how to capitalize on it; When to bet, and more importantly, when NOT to bet; how to tread water at a choppy table, and hold on to your money until the monster roll comes along; How to bet on that monster roll the RIGHT way; AND, most importantly, how to always know what you are going to do next, no matter what you have bet, or what number is rolled. I'll show you why the Fibonacci sequence of numbers is the easiest way to parlay your bet on a winning roll. Once you know this simple technique, you will never forget it. It involves NO math at all, whether you're betting \$5 or \$5000. The steps are the same whatever your bet is, and they're simple to do. I'll show you why the "standard advice" of putting a bet on the Pass line and backing it with double Odds is the WORST advice in the casino. Every other book on Craps is WRONG about this, and I will prove it. Lastly, you will double your comps for the same amount of risk when betting on the Pass line. I'm going to make a bold prediction: Ten years from now, any craps player NOT betting the OWN BIG RED way will be thought of as an idiot. It's your choice.

Give it a shot. Learn how you can OWN BIG RED today. You get the same great money-back guarantee as all the Kindle e-books on You have nothing to lose, and everything to gain. Good luck. My two wishes for you are that 1) you "break the bank", and 2) that I am standing next to you when you do.

Customer Reviews

This is not your run-of-the-mill "how-to" book. Beginners should look elsewhere for the basics of how the game is played. NOBODY can teach you how to "win big" at craps. The author, bless his heart, makes no such claim. Neither does he (to his great credit) expound on the insane notions known as "controlling the dice". The author is quite obviously an experienced player; he knows the game and he knows that the odds of winning big at craps are daunting at best., and there no possible "system" that can overcome the odds on a consistent or repeatable basis. Craps is a game of cycles and streaks, hot, cold and choppy. What the author presents in this book is a strategy for waiting out the choppy cycles until the "hot" or "cold" streak hits. Whether it works or not may be questioned by some, but to me, a thirty-three year Craps player, the author's math is sound and the strategy is reasonable, if you have the patience to use it. What may be of even more value to some players is his treatment of practice, planning, money management, the importance of mental attitude and knowing when to walk.

I enjoyed the book. It offered several new concepts to aid the player to play longer with smaller losses. The Fibonacci betting method makes more sense than other methods. I am a beginning player who has a limited exposure to the game. I have read several books by various authors to learn the game. I am a small bankroll player who is looking for ways to extend table time. This book provides one method to accomplish that goal. It is nice to read a new fresh approach to the game. I recommend this book to anyone. It decreases losses to whipsaw tables.

Book has interesting betting method but not sure u can beat the house odds with it. You have to be able to recognize the hot roll when it comes. But I did enjoy the book.
