Customer Reviews

This book of one-page mysteries (plus answers on the reverse page) are in sections: 15 life science, 15 Earth and space science, 15 physical and chemical science, and 15 general science. Also added are 5 more mysteries, and 5 to be solved with math. My 11-year old grandson can understand the mysteries, but is rarely able to work out the answer. However, they are good education.

due to Common Core...and the many guidelines teachers are forced to meet the mysteries are great for those off days when 50% of your students are out with the flu.....or when it starts snowing and 2/3 of the parents call and pick up their children early due to weather.....You can brainstorm and discuss without leaving students out...or getting ahead of those who are missing class.....

Their first volume of 'SCIENCE Mysteries' was good, and so is this 'MORE SCIENCE Mysteries' sequel. [I also bought their 'MATH Mysteries' first book, however, haven't been able to locate a sequel for that one (...did same publisher not make a 'MORE MATH Mysteries' book?)].

These short one minute mysteries are great to get the kids thinking. I introduced one of our teachers to it and her class was very happy with the extra challenge.

good learning and fun for a 10 year old

This book was not what I expected!!!
