Filed Rate Doctrine (Public Utility Series)

Synopsis

This casebook contains 103 federal court of appeals decisions that interpret and apply the filed rate doctrine. The selection of decisions spans from 2000 through December 2011 and is organized by jurisdiction. The decisions are listed in the order of frequency of citation. The most cited decisions appear higher in each section. The filed rate doctrine, a corollary to the rule against retroactive ratemaking, forbids a regulated entity from charging rates for its services other than those properly filed with the appropriate regulatory authority. *Exxon Mobil Corp. v. FERC*, 571 F. 3d 1208 (DC Cir. 2009)
