# Our Latest Ideas About Five Number Lotto Games: How To Play Fantasy 5, Cash 5, Mega Millions, And Powerball

## Synopsis

In this book, we use Powerball as our example game and show how to do the analysis to find the five numbers to play. We also show how to pick the bonus ball when we are playing a game that has one. The same approach works for Mega Millions, Cash Five, Fantasy 5, and similar five number games without a bonus ball.

## Customer Reviews

James Bender wrote a great book. He shows by example how he uses:  
1. Frequency of occurrence  
2. Position Analysis to Track his numbers  
I use: Position generates to Track my numbers, going back 30 games. Say first winning number last game was number 5. I go down my list of 30 previous games and find 5 in position 1. Write down all the numbers from the game that came in after. Track p1 on one page p2 on separate page. Check frequency of numbers. Missing numbers not occurring in those 30 games. Games with all numbers above 20 ..... Power ball had one a month from 12/21/2013 to 2/11/2015 When a jackpot is hit I mark that in my notes  
Check how many games have: Position one (P1) 2 and (P5) 50 something P1 (5) P5 (50) something  
The missing numbers by month works for games that do not have an extra ball. Take the total numbers in game write them down on a piece of paper. Pick any month start with first game of month continue to last

game mark off the numbers that played. Go to very next month highlight the missing numbers from previous month. To see if this is a pattern check three consecutive months. There are always 8 or 9 games per month try to see if all game one in each month has a trend. Check game 2 of each month is there a pattern?

it is on the kindle and I can not see it very well

Is this a book. I have to read it ImMichelleharvey
