Every Chapter starts with a real life case; The Chapter reviews at the end help with studying and it keeps the reading/learning interesting.

IT's a good book however it doesn't making getting back to certain points easy. Many of the subject lines don't start until the middle of a paragraph which makes skimming for a point hard to do.

Packed full of useful information and true incidents. This is the textbook many colleges use for their Victimology class.

Book I had to get for class at UWG
