Healing The Symptoms Known As Autism - 2nd Edition

Synopsis

In the seven months since the release of the first edition of this book, 22 more children have lost their autism diagnosis and returned to a state of health, for a total of 115 recovered children and counting. Hundreds more have lost ATEC points, as well as shown many cognitive, behavioral, emotional and physical gains thanks to the protocol outlined in these pages. This edition includes all protocol updates and a whole lot more including: (1) how to heal older, self-injurious and/or aggressive children; (2) GcMAF and its role in healing autism; (3) gluten's role in molecular mimicry and autoimmunity; (4) a new method of CD preparation; (5) an improved and easier to follow parasite protocol; along with (6) a special calendar so you know what to do when; (7) many new testimonials from parents sharing their real-life experiences using this protocol; and much more... Dietrich Klinghardt MD, PhD, says | The world of autism is rocking again. Kerri Rivera has done it. In this comprehensive book she has condensed and simplified the core elements of the biomedical approach, those that work 90% of the time on 90% of the children. Her focus on using a unified and affordable approach to reduce the body burden of chronic infections and infestations is addressing the very core issue of most autistic children and adults. It has made her method the most powerful tool to this day to help many children recover safely, inexpensively and solidly. Her research is validated by the enormously positive response from parents from all over the world. Teri Arranga, Executive director of AutismOne, says | In 3 years, 115 children previously diagnosed with regressive autism were able to shed their diagnosis, their symptoms and return to an overall state of health and vitality. If you have any interest in finding out how they were able to heal you need to read this book. Kerri has a heart for children with autism, and she cares greatly about recommending safe, economical interventions that are helping to confront an epidemic.

Customer Reviews

I just finished reading this book and it makes a lot of sense. I wanted to investigate this as a possible treatment for my child. I see that there are a lot of negative reviews from people calling autism parents child abusers and accusing them of poisoning their children with bleach. LOL - their phony troll reviews only make me want to try this regimen even more. After all there must be a reason they have come out with a full on troll attack - maybe they are the same group that is responsible for the reports to the FDA on GcMAF that led to the raid on Bradstreet and his subsequent death. I don't trust such people and groups and thus I am even more curious about both CD and GcMAF as an autism treatment. Seems they only want to quell interest when something actually works. I don't see them coming out against cancer chemotherapy which is literally a poison to all cells and has a terrible efficacy rate. I don't see them trolling and protesting when children are made to undergo chemotherapy and radiation that can kill them. Like I said, I haven't yet tried the CD and am just in the investigative stage. I really appreciated how the book clearly outlined the steps of what you need to purchase, how to mix, how to dose in extremely slow, incremental stages and what to watch out for. I think the photos were fantastic and the tips on what bottle to use was helpful. Its clear the author is very interested in helping children to overcome autism and heal. One thing that I can agree with the annoying trolls is on the subject of rope worms. I just do not understand how the book can talk so much about this topic and not perform a dna test on this substance/thing. This makes me believe these are not from a living thing and are some sort of waste product.

I know what parents must think when they read about this book. I was one of those parents. I have tried everything to help my son. hundreds of hours of speech and OT, ABA, Biomedical, eye therapy, floortime, RDI, ect.... I have spent well over \$100,000 in those therapies. Not to mention the stress of managing all those therapies and research has caused stress on my family that cannot be repaired. The diet was the hardest part for me and still is. But when I saw what came out of my son and when it tested positive for harmful levels of ammonia, I am determined to stay in the game and follow this protocol. I am in month 5 right now and can see some gains. Before the protocol my son could not tell me why he was scared. Now he is now starting for the first time to work through his

feelings and manage his behavior. Our ATEC is about a 26 - 29. We started about a 55 - 60. My biggest problem I face is when people don't think these are parasites I am pulling out. Who cares what they are!!!! I have proven they are toxic and that should be enough. I wouldn't care if they were cheerios or rubber bands coming out. IF THEY ARE TOXIC >>>GET THEM OUT!Has anyone read the symptoms of a parasitic condition? Here is one transmitted through the tsetse fly.Infection and symptomsIn the first stage, the trypanosomes multiply in subcutaneous tissues, blood and lymph. This is known as a first stage or haemolymphatic phase, which entails bouts of fever, headaches, joint pains and itching.In the second stage the parasites cross the blood-brain barrier to infect the central nervous system. This is known as the neurological or meningoencephalic phase.
