Synopsis

These beautifully illustrated and fun-to-read storybooks simplify and normalize complicated childhood conditions, like cystic fibrosis. When read aloud, other children can identify why a peer may be treated differently and begin to empathize with them. In addition, children whose conditions set them apart as being different begin to feel accepted and safe. Each book includes a Kids' Quiz to reinforce new information and Ten Tips for Teachers to provide additional facts and ideas for teacher use. In *Taking Cystic Fibrosis to School*, Jessie explains to her classmates that even though she has cystic fibrosis, she can still attend school.

Customer Reviews

This book is terrific. It is great for any child that is in the beginning years of school. It educates the reader about cystic fibrosis and assists children in dealing with classmates or friends who may have cystic fibrosis. My seven year old son thought it was informative and fun to read. There should be more books of this kind.

As a parent educator and a mom of 2 kids with cystic fibrosis, I can't say enough about this book and the whole series in fact (there is one for diabetes, asthma and many other conditions). Young

children learn best from pictures and the artwork in this is great. There is nothing "scary" in it about having CF, it is informative, matter-of-fact and hopeful. My own two children (with CF) loved it when they were younger and received a black and white version from the CF clinic as a coloring book. I highly recommend it for younger children with CF and their siblings. For a parenting book about how to raise kids who have CF and other health issues, see: *Parenting Children With Health Issues: Essential Tools, Tips, and Tactics for Raising Kids With Chronic Illness, Medical Conditions, and Special Healthcare Needs*

Good book. Good to know what your kid is going through. It is not exactly what is going on in my students life but it was very close.

My son has Cystic Fibrosis and this book is great! It helps us explain to him and other kids his age about what it is and isn't.

Great!
